SUBJECT: Engineering Study LAC-91, In-flight Refueling
TO: Contracting Officer

The WSPD approves the expenditure of effort on this study relative to the practicability and requirements to add in-flight refueling capability to the U-2.

This approval is predicated on the condition that if either the WSPD or Project should adopt IFR, that agency would absorb the cost of this preliminary effort. In the event neither agency installs IFR, the cost of this study will be borne by the WSPD.
